

KOKA LAGOON CRUISE Rarotonga

Imagine setting out upon the beautiful turquoise waters of Muri Lagoon - aboard Koka's spacious glass bottom boat, without a doubt the perfect way to enjoy seeing Rarotonga from the water and experiencing the colour and life of the magical lagoon.

Locally made—Koka's modern, spacious and comfortable glass bottom boats are made with steel frames and natural roofing, sturdy yet subtly fitting into the local surroundings. With generous leg room, safe hand railing, life jackets and ramp for easy access the boats are wheelchair compatible and elderly friendly as well as for children. Koka Lagoon Cruise is able to cater for groups big or small, or hired out for special occasions. Koka Lagoon Cruises donates a percentage of all sales to marine conservation.

Raui Conservation System

Large areas of the lagoon of Rarotonga have been placed under a traditional Raui Conservation System where a complete ban on fishing is enforced by the traditional leaders of the community. This has resulted in the fantastic growth of sea life in these areas. As you cruise across Muri Lagoon towards the Titikaveka coastline, you will see the result of this effort.

Snorkelling

A particular area has been designated for snorkelling during the cruise in Titikaveka lagoon. Although it is accessible from the beach, the easiest way to access the area is by boat. The water is approximately 15 feet deep with rows of tall coral heads surrounding the snorkelling spot. Here you can swim amongst schools of tropical jewel coloured fish and view the giant clams.
