

## PACIFIC DIVERS - Tank Dives

Rarotonga

Experience the magic of the Pacific Ocean and enjoy the beautiful unspoiled coral reefs of Rarotonga on the Tank Dives. Trips operate twice daily and are restricted to certified divers only.

Rarotonga's reef is host to many beautiful dive sites with much to see, including coral gardens, fishes, giant moray eels and if you're lucky you might even catch a glimpse of green hawksbill turtles, white tip and grey reef sharks and rays.

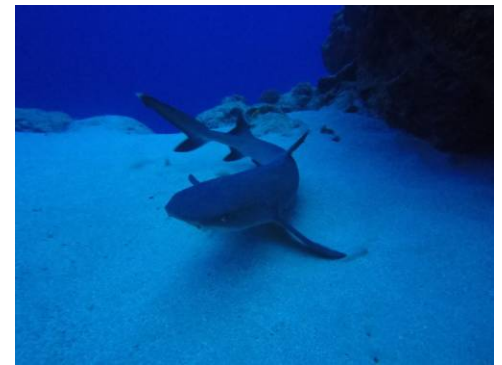

Dive spots vary in depth and characteristics, and depending on where you dive, this would best determine what you can expect to see. One thing is certain: no matter where you dive, you are always guaranteed to see something extraordinary.

Rates include your equipment, guided dive, and dive computers for all divers. You can also chose to bring your own gear.

Night Dives are also available on request and include all the necessary equipment.

● Dive sites on all sides of the island

### TOUR HIGHLIGHTS

#### Great Diving Spots & Unlimited Time

Diving over the reef is a highlight itself and is one of the greatest things one can experience. With over 20 sites at your disposal, you are almost always guaranteed a dive.

#### Safety First

Pacific Divers have taken all the necessary requirements to ensure that your safety is taken seriously and provide all the necessary safety equipment as well having all dive instructors trained in First Aid. There is always a Dive Master and Boatman on every trip.

# PACIFIC DIVERS - PADI Dive Courses

Rarotonga

Steve and his fantastic team at Pacific Divers offer a comprehensive and wide range of diving trips to cater for all skill levels.

The PADI Dive Courses include the Discover Scuba Dive and Discover Scuba Lagoon Dive trips. These courses are suitable for non-certified divers and are a great option for absolute beginners.

At Pacific Divers they understand that taking your first breathe underwater is a thrilling adventure and your instructors are there to ensure you have the best experience possible. Groups are kept at a max of 4 students per dive instructor.

The Discover Scuba Dive offers an introductory lesson into diving where you will learn how to use scuba along with other diving equipment and be taught the diving basics—enough to be able to dive confidently under the supervision of your instructor. Once you are comfortable using scuba, you will then head out over the reef.

The Discover Scuba Lagoon Dive is a two hour guided trip that takes you for a tour of the Tikioki lagoon Marine Reserve with an instructor by your side. The lagoon here is no deeper than 3 metres and is great for swimming or snorkelling and for trying out scuba. This tour offers a basic introduction into using scuba and focuses less on diving skills and more on enjoying your surroundings and the underwater environment. There is much to see in our lagoon, including plenty of tropical fishes and corals, particularly out near the reef.

Note: Discover lagoon trips do not take you over the reef.

Please note that light refreshments are not included on any of these tours.
